SUMMARY

DevOps Engineer with hands-on experience in Docker, Jenkins, Linux server administration, AWS, and Nginx/IIS-based CI/CD pipeline management. Skilled in deployment automation, monitoring, and cross-team collaboration to improve deployment efficiency and infrastructure reliability.

SKILLS

DevOps Tools: Docker, Jenkins, CI/CD Pipelines, GitLab CE

Operating Systems: Linux, Windows Server

Web Servers: Nginx, IIS (Reverse Proxy, Hosting)

Cloud: AWS (Infrastructure Management & Deployment)

Version Control: Git, GitHub

Languages: JavaScript, Python

Database: MySQL

EXPERIENCE

DevOps Engineer — *Honchominds*

Apr 2026 – Present

- Managed and maintained CI/CD pipelines using Jenkins to automate build and deployment workflows across multiple projects.
- Containerized applications using Docker to ensure consistent, repeatable deployment environments.
- Configured and administered Nginx and IIS servers for application hosting and reverse proxy setup.
- Monitored application uptime, server health, and deployment performance to maintain infrastructure reliability.
- Supported AWS cloud infrastructure management and deployment activities.
- Collaborated with development teams to streamline and standardize deployment workflows.
- Performed Linux server administration, troubleshooting, and log monitoring to resolve production issues.
- Implemented deployment validation and rollback procedures to reduce risk during production releases.

Web Content Executive — *Future Market Insights, Pune*

Aug 2025 – Apr 2026

- Managed and updated website content across multiple platforms, ensuring accuracy and consistency.
- Deployed updated website content to production following validation and QA checks.
- Monitored website performance and availability post-deployment.
- Worked with IIS and Nginx servers to support deployment and content updates.
- Applied SEO techniques to improve visibility and structured content delivery.

Data Science Intern — *AI Variant*

Jul 2024 – Oct 2024

- Built a resume classification system using Python and NLP techniques.
- Performed data preprocessing, feature engineering, and model tuning to improve classification accuracy.
- Automated the candidate screening pipeline, reducing manual review effort.

PROJECTS

Resume Classification System

- Developed a machine learning model using Python and Scikit-learn for automated resume classification.
- Applied preprocessing and feature selection techniques to improve model accuracy.
- Containerized the application using Docker and deployed it on AWS.

Driver Safety Mobile App

- Built a mobile application using Flutter and Dart.
- Integrated GPS tracking and a real-time alert system for driver safety monitoring.

EDUCATION

Postgraduate Diploma in Management — 2024 – 2026 | First Class with Distinction

B.E. in Information Technology — NBN Sinhgad College, Pune | 2019 – 2023 | First Class with Distinction
